

## INTERNATIONAL ADVANCED TRAINING

### DENTAL AND AESTHETIC TREATMENTS

#### Date

04.-05.04.14  
13.-14.06.14  
10.-11.10.14

#### Duration

*Friday – Saturday*

#### Location

**Fotona**  
choose perfection

## Program objectives

- Gain an in-depth knowledge of lasers
- Discuss new approaches and complex clinical cases
- Learn how the Fotona dental system can also be used in facial aesthetic treatments
- Share experiences, ideas, and expertise in a relaxed atmosphere
  
- Learn how to gain maximum benefit for your practice

## Preliminary Schedule

Friday from 14.30 to 18.30

Saturday from 9.00 to 16.30

### Introduction

Workshop team presentation, schedule and patient overview.

### Basics of Lasers

Brief review of specific topics (basic knowledge is suggested).

### Wavelengths & tissue interactivity

Overview of the different wavelengths in laser-assisted dentistry, related to the absorption in different tissues, resulting in specific indication ranges and advanced protocols.

### Indications in laser assisted dentistry:

**Ablation**, as mainly in aesthetics (& cosmetics), conservative dentistry (incl. prosthodontics and cad/cam), oral soft and hard tissue surgery,

**Decontamination**, as in endodontics and periodontology, and

**Photobiomodulation** for hypersensitivity, pain control and wound healing.

Each indication is explained from the tissue interaction with the appropriate wavelength to different clinical cases, presenting the newest evidence-based protocols in multimedia as well as through a live patient demonstration with an interactive open discussion.

### Q&A

Integrated as part of the workshop.

All participating principle lecturers are certified Expert Clinical Lecturers of the Laser and Health Academy.

The **Laser and Health Academy** is an independent institution, developed and founded with Fotona's support, with the aim to advance medical, technical and scientific knowledge in the field of Lasers and their application in Medicine and Dentistry. It serves as a platform for exchange and dissemination of scientific knowledge among peers and to promote evidence-based laser medicine and dentistry among practitioners and the general public.

The Academy's key activities center on practical instruction and demonstration of laser techniques and procedures. These are delivered through a variety of workshops, seminars and specialized events either at the Laser and Health Academy's own training and demonstration facility or on-site at the Laser and Health Academy Lecturers' surgeries and clinics.

Visit [www.laserandhealth.com](http://www.laserandhealth.com) for more information about the Academy's activities and more on the use of lasers in medicine and dentistry.

## Faculty

**Krešimir Simunović, DMD, M.Sc.**

Dr. Simunović is a graduate from the Faculty of Dentistry at the University of Zurich, Switzerland. After practicing general dentistry for 2 years in private practice he joined Zurich University's Faculty of Dentistry, as an assistant to Dr. Krejci, focusing his studies on the effect of CO2 laser in hard dental tissues and common restorative materials. He received his Doctorate Degree from the same faculty in 1991 for his work, presenting his paper at the 2nd World Convention of Lasers in Dentistry. The following year he became an assistant at the Department of Oral Dental Surgery, under the guidance of Dr. Gion Pajarola, being mainly responsible for radiotherapy and laser therapy patients. In 1997 he established his own dental office focusing mainly on laser-assisted general and aesthetic dentistry, periodontology and oral dental surgery. Dr. Simunović is a Board Member for Dentistry of EMLA, an international associate member of the Chicago Dental Society, and member of various Swiss dental societies, among which the Swiss Society of Oral Laser Application. He is the author of numerous published papers and teaches laser-assisted dentistry in both theory and practice. Dr. Simunović has been a speaker in several national and international workshops and events.

## Workshop daily objectives

During the intensive one-and-a-half day workshop, participants will gain an in-depth knowledge of lasers, including all the "tricks" that Dr Kresimir Simunovic has learned during his 23 years of experience with different laser systems.

We will have the opportunity to discuss new approaches and complex clinical cases. The workshop includes a full-day live demonstration in a dental practice, where at least 10 patients will be treated. Additionally, participants will learn how the Fotona dental system can also be used in facial aesthetic treatments.

With small groups of up to 7 participants, the Laser and Health Academy workshops are an ideal opportunity for dental practitioners from all over the world to interact and share experiences, ideas expertise in a relaxed atmosphere.

**The Laser and Health Academy** is a framework, developed, founded and supported by Fotona, with the aim to advance medical, technical and scientific knowledge in the field of Lasers and their application in Medicine and Dentistry. It serves as a platform for exchange and dissemination of scientific knowledge among peers and to promote evidence-based laser medicine and dentistry among practitioners and the general public.

Its key activities centre on practical instruction and demonstration of laser techniques and procedures. These are delivered through a variety of workshops and seminars either at the Laser & Health Academy's own training and demonstration facility or on-site at the Laser & Health Academy Lecturers' surgeries and clinics.

## Places to stay

Zurich has a wide offering of accommodation offerings to suite everybody's taste, needs and budget. The following hotels are particularly popular with our workshop participants and are recommended by us. A wider offering of accommodation can be found on <http://www.zuerich.com>

Historic hotel on the beautiful shores of Lake Zurich.

<http://www.sonne.ch/>

The boutique hotel Ambassador à l'Opéra is situated in the exclusive district of Seefeld and is a prominent feature of Zürich's cityscape.

<http://www.ambassadorhotel.ch>

The tastefully designed hotel is located in the very heart of Zurich, directly opposite the internationally renowned Zurich Opera House

<http://www.operahotel.ch>

The beautiful, mountainous country of **Switzerland** is landlocked in south-central Europe, and remains one of the most popular travel destinations on the planet.

It's famed for banking institutions, watch makers, cheeses and chocolates, mountain glaciers and lakes, and of course, fabulous skiing in the Alps.

### Zurich

Grossmünster is one of the three most important churches in Zurich, together with Fraumyunster and the Church of St. Peter. This monastery is executed in the Romanesque style, which played a significant role in the history of the Protestant Reformation. The central part of the cathedral near the banks of the River Limmat was built on the site Carolingian church

Due to its geographical position, Zurich also represents an ideal starting point to discover the amazingly diverse features and beauty of Switzerland.
